

Clean Air Act Title V Permit Program

GOAL: Operate campus emission units in accordance with permit requirements.

LEGEND

Malfunction/Deviation Occurs when operations are not in compliance with permit conditions.

- Indicates the number of times the University has notified the Illinois Environmental Protection Agency (IEPA) that a permit condition has been violated.
- Most violations are due to excess pollutant emissions.
- A low number of notifications indicate campus air emission units are being optimally operated.
- No Clean Air Act violation notices (VN) have been issued during these time periods.
- The University's Title V permit, first issued in 2003, has driven process and management improvements over time.
